HONEYCOMB BLINDS

Honeycomb blinds inspired by the world's most perfect architecture — the design of the honeycomb. Because of its hexagonal superimposed construction, breeds infinite beauty. It can obtain the maximum support while maintaining the minimum quality, not only solid and light but also sound absorbing and breathable. Its UV protection and heat insulation function effectively protects household items. The cords are hidden in the hollow layer which make it look simply and elegant. It is also easy for operation. There are many different systems available: Day & Night, Top-down & bottom-up, sliding door and Skylight... Suitable for villas, homes, star hotels, office buildings and other places.
